

Javo PPU 2.0

The compact and fast push over unit for transport wagons

The completely redesigned Javo PPU 2.0 offers the solution to automatically place round and square pots onto trolleys. Ideal for nurseries and greenhouses with longer distances between their different production departments. Let this compact and accurate push over unit do the work for you.

Characteristics

With its touchscreen with 50 program options, the Javo PPU 2.0 can be easily converted to another pot size. This makes the machine very user-friendly. The machine can also handle trays.

Your pots are always positioned as desired on the transport wagon, because of the cooperation between the chain track and the push over unit. The elevator movement keeps the pot upright. It prevents pots from falling over while during the movement and also ensures that larger and higher plants do not get entangled. And so the top layer on the pot will not fall out of the pot.

JAVO

A NOBELS GROUP COMPANY

for generations of growth

Javo PPU 2.0

Advantages

- Suitable for various trolley widths and heights.
- Suitable for round pots, square pots and trays.
- Both left and right acting available.
- Operation via display with touchscreen.
- 50 program possibilities.
- Pots will be placed upright on the trolley, which prevent pots from falling during the movement.
- Top layer on the pot will not be wasted.
- Plants will not get entangled.
- High capacity possible, because the different motions work simultaneously.
- Pots are always positioned on the transport wagon as desired.
- CE marked and complies with the Machine directive 2006/42/EG or with the UL/CSA guidelines for the US and Canada.

Technical details

Suitable for:	round and square pots, trays
Pot sizes:	10,5 up to 45 cm
Tray width:	about 30 cm
Capacity:	up to 400 beats per hour
Width conveyor belt:	300 mm
Trolley height:	min. 300 mm, max. 630 mm
Trolley width:	standard 1.500 mm, optional 1.200-1.800 mm
Voltage:	400V 50Hz 3~ +N +PE / 220V 60Hz 3~ +PE
Power connection:	16A, 5 pins CEE plug
