

# Javo Big Bale

## Worry-free and efficient substrate dosing

This dosing unit handles substrate or bark from all full-size compressed bales with ease. The powerful motor-driven tilting system allows a big bale to be tilted into place efficiently and safely while keeping the work environment clean.

The Javo Big Bale is easy-to-use and maintenance-friendly. The machine is easy to move with a forklift and, with an optional wheelset, can even be moved with a pallet jack.

### How the machine works

The chain-driven scraper bars quickly loosen the substrate and move it to the discharge outlet. There, adjustable counter-turning "fingers" break the soil into the desired consistency.

A level control beneath the discharge outlet is equipped with adjustable measuring points, controlling the soil supply into the connected machine.

**JAVO**

A NOBELS GROUP COMPANY

for generations of growth

# Javo Big Bale

## Advantages

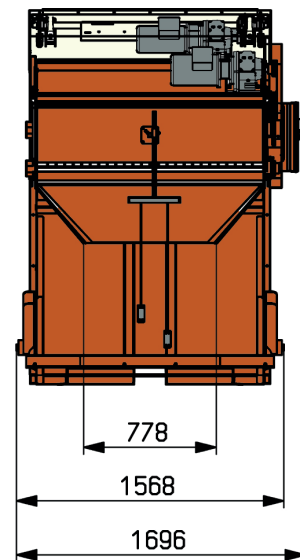

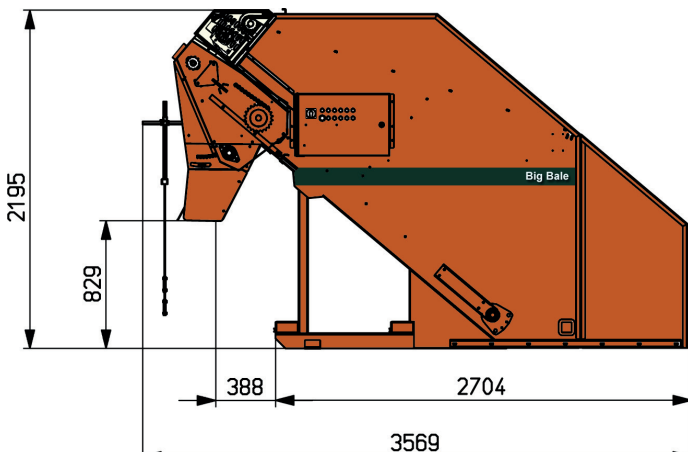

- Simple operation
- High quality chain and sprockets
- Accurate substrate dosing
- Suitable for all standard big bales
- Maximum retention of structure, volume and aeration
- Safe set-up due to integrated pivot system
- Low maintenance
- Level control for automatic feeding
- Spring-loaded safety cover for irregularities in potting soil, adjustable per product

## Available options

- Suitable for potting soil and bark in various types of packaging
- Moveable design
- Water dosing system
- Heightening set (350 mm)

## Technical details

<b>Suitable for:</b>	all standard big bales
<b>Capacity:</b>	Depending on machine configuration, pot and soil
<b>Length:</b>	3.480 mm
<b>Width:</b>	1.696 mm
<b>Height:</b>	2.195 mm
<b>Weight:</b>	1.380 kg
<b>Voltage:</b>	400V 50Hz 3~ +N +PE / 220V 60Hz 3~ +PE
<b>Power connection:</b>	16A, 5 pins CEE plug
